The Eagle's Shadow Mark Hertsgaard 2003-09-01 What America looks like to the rest of the world Americans rarely used to think about the outside world. As the mightiest nation in history, the United States could do as it pleased. Now Americans have learned the hard way that what outsiders think matters. When terror struck last September 11, author Mark Hertsgaard was completing a trip around the world, gathering perceptions about America from people in fifteen countries. Whether sophisticated business leaders, starry-eyed teenagers, or Islamic fundamentalists, his subjects felt both admiring and uneasy about the United States, enchanted yet bewildered, appalled yet envious. This complex catalogue of impressions--good, bad, but never indifferent--is the departure point for a short, pointed essay in the tradition of Common Sense and The Fate of the Earth. How can the world's most open society be so proud of its founding ideals yet so inconsistent in applying them? So loved for its pop culture but so resented for its high-handedness? Exploring such paradoxes, Hertsgaard exposes uplifting and uncomfortable

truths that force natives and outsiders alike to see America with fresh eyes. "Like it or not, America is the future," a European tells Hertsgaard. In a world growing more American by the day, The Eagle's Shadow is a major statement about and to the place everyone discusses but few understand.

Leveraged Innovation F. Bidault 1998-11-06 Leveraged Innovation reveals that a dramatically different approach to the supplier-client relationship is being developed by leading companies around the world. It documents the benefits of Early Supplier Involvement (ESI), a radically new approach to inter-company relations which is providing a powerful impetus for increased creativity. Based on the findings of a European Research team, the text clearly shows how, why and to what effect suppliers the world over are becoming increasingly involved in the innovation process itself. Leveraged Innovation demonstrates and documents the process through which increased co-operation can lead to real competitive advantage. Leveraged Innovation is both an introduction to Early Supplier Involvement and a dynamic overview of best practise around the world. It provides important practical insights for enterprising companies, enabling the development and maintenance of ESI programmes of their own.

Beyond the Eagle's Shadow Virginia Garrard-Burnett 2013-12-15 The dominant tradition in writing about U.S.-Latin American relations during the Cold War views the United States as all-powerful. That perspective, represented in the metaphor "talons of the eagle," continues to influence much scholarly work down to the present day. The goal of this collection of essays is not to write the United States out of the picture but to explore the ways Latin American governments, groups, companies, organizations, and individuals promoted their own interests and perspectives. The book also challenges the tendency among scholars to see the Cold War as a simple clash of "left" and

“right.” In various ways, several essays disassemble those categories and explore the complexities of the Cold War as it was experienced beneath the level of great-power relations.

The Automobile in American History and Culture Michael L. Berger 2001 Presents a collection of bibliographic essays that describe the history, culture, and impact of the automobile and automobile industry in the United States.
