Gladiators and Beast Hunts Christopher Epplert 2015

Gladiators and Beast Hunts Christopher Epplert 2015-09-30 Gladiators and Beasthunts is a comprehensive survey of arena sports in ancient Rome, focusing upon gladiatorial combat and the beast-hunts (venationes). Whilst numerous books have already been written on arena spectacles in ancient Rome, they generally neglect the venationes, despite the fact that the beast-hunts, in which men were pitted in mortal combat against various dangerous wild animals (including lions, tigers, elephants and rhinos), were almost as popular as gladiatorial spectacles and were staged over a longer period of time. Dr Christopher Epplert, gives a full and detailed treatment of both types of spectacle. The author starts by explaining the origins of these bloody combat sports in the late Roman Republic, before surveying the growth of these events during the first two centuries of the Empire, when emperors possessed the resources to stage arena spectacles on an unmatched scale. The details of the training, equipment and fighting styles used by different types of combatants are covered, as are the infrastructure of the arenas and behind-the-scenes organization that was essential to the successful staging of arena events. Particular attention will be paid to the means by which Roman spectacle organizers were able to procure the countless wild animals necessary for the staging of venationes throughout the Empire. This is a gladiator book with added bite and sure to be welcomed by scholars and general readers alike.

By the Sword Richard Cohen 2007-12-18 "Like swordplay itself, By the Sword is elegant, accurate, romantic, and full of brio—the definitive study, hugely readable, of man's most deadly art."—Simon Winchester With a new Preface by the author Napoleon fenced. So did Shakespeare, Karl Marx, Grace Kelly, and President Truman, who as a schoolboy would practice fencing with Bess—his future wife— when the two of them returned home from school. Lincoln was a canny dueler. Ignatius Loyola challenged a man to a duel for denying Christ's divinity (and won). Less successful, but no less enthusiastic, was Mussolini, who would tell his wife he was "off to get spaghetti," their code to avoid alarming the children. By the Sword is an epic history of sword fighting—a science, an art, and, for many, a religion that began at the dawn of civilization in ancient Egypt and has been an obsession for mankind ever since. With wit and insight, Richard Cohen gives us an engrossing history of the world via the sword. Praise for By the Sword "Touché! While scrupulous and informed about its subject, Richard Cohen's book is about more than swordplay. It reads at times like an alternative social history of the West."—Sebastian Faulks "In writing By the Sword, [Cohen] has shown that he is as skilled with the pen as he is with the sword."—The New York Times "Irresistible . . . extraordinary . . . vivid and hugely enjoyable."—The Economist "A virtual encyclopedia on the subject of sword fighting."—San Francisco Chronicle "Literate, learned, and, beg pardon, razor-sharp . . . a pleasure for practitioners, and a rewarding entertainment for the armchair swashbuckler."—Kirkus Reviews (starred review)

A Lover's Sword W.M. Kirkland 2017-12-17 Fabius never wanted to be a gladiator, but the priesthood--his true calling--wouldn't accept him. When a flash of white light takes his partner Dursus from the arena, leaving him alone to face Brutus' wrath, Fabius is certain this is the end. The gods have exacted their payment--by sending him through time? Max studied the legend of the five gladiators who disappeared without a trace. He never imagined the final one would arrive on his doorstep. For a professor of Roman history, Fabius' arrival is like a dream come true. For the man, his body is an exquisite marvel and one in which he can take hours of pleasure. The sword he'd been studying may have belonged to a gladiator. Now, it belongs to his lover and the legend has come full circle.

By the Sword Richard Cohen 2010-06-10 The art and science of sword fighting goes back almost to the dawn of civilization and has been an obsession for much of mankind throughout recorded history. From the Roman arena to feudal Japan and from the duellists of Europe to the development of modern-day Olympic fencing, Richard Cohen traces the course of swordsmanship with wit and erudition in a fascinating and wonderfully discursive account. Packed with anecdote, superbly written and built on a solid foundation of

historical research, this is a tribute to a deadly but beautiful skill, the mastery of which for centuries defined a man.

Gladiators Roger Dunkle 2013-09-13 The games comprised gladiatorial fights, staged animal hunts (venationes) and the executions of convicted criminals and prisoners of war. Besides entertaining the crowd, the games delivered a powerful message of Roman power: as a reminder of the wars in which Rome had acquired its empire, the distant regions of its far-flung empire (from where they had obtained wild beasts for the venatio), and the inevitability of Roman justice for criminals and those foreigners who had dared to challenge the empire's authority. Though we might see these games as bloodthirsty, cruel and reprehensible condemning any alien culture out of hand for a sport that offends our sensibilities smacks of cultural chauvinism. Instead one should judge an ancient sport by the standards of its contemporary cultural context. This book offers a fascinating, and fair historical appraisal of gladiatorial combat, which will bring the games alive to the reader and help them see them through the eyes of the ancient Romans. It will answer questions about gladiatorial combat such as: What were its origins? Why did it disappear? Who were gladiators? How did they become gladiators? What was there training like? How did the Romans view gladiators? How were gladiator shows produced and advertised? What were the different styles of gladiatorial fighting? Did gladiator matches have referees? Did every match end in the death of at least one gladiator? Were gladiator games mere entertainment or did they play a larger role in Roman society? What was their political significance?

*Includes ancient accounts of gladiatorial games and other spectacles. *Explains how the Colosseum was designed and built, as well as how seating was arranged. *Describes the different classes of Roman gladiators and the armor and weaponry they used. *Includes footnotes and a bibliography for further reading. "He vows to endure to be burned, to be bound, to be beaten, and to be killed by the sword." - The gladiator's oath, according to Petronius in the Satyricon. When the Colosseum was built in the late 1st century A.D., the Romans, a people known for their architectural acumen, managed to amaze themselves. Martial, a Roman poet writing during the inauguration of the Colosseum, clearly believed the Colosseum was so grand a monument that it was even greater than the other Wonders of the Ancient World, which had been written about and visited endlessly by the Romans and Greeks in antiquity. Indeed, although the Wonders were wondrous to behold, the Colosseum was a spectacular achievement in architecture, something new and innovative, and therefore an amazing "Wonder" in its own way. The Colosseum was designed to be both a symbol and show of strength by the famous Flavian emperors, most notably Vespasian and his sons Titus and Domitian. Vespasian had started the construction of the Colosseum shortly after becoming emperor in 69 A.D., but he died before he could present any spectacles in his giant amphitheatre. That honor went to his son Titus, who celebrated the inaugural opening in 80 A.D. with 100 days of games, despite the fact that the Colosseum was not completely finished. When his brother Domitian came to power in 81 A.D., he finished the amphitheatre, but not without making some changes to the overall design. By the time it was truly finished, the Colosseum stood about 150 feet tall, with the oval in the center stretching nearly two football fields long and over 500 feet across. The Colosseum is a large stadium even by today's standards, and its great size conveys the power of the empire as it dominates the landscape and towers over nearby buildings. Of course, the main events in the Colosseum were gladiator fights. Gladiators are somewhat synonymous with ancient Rome, and even thousands of years after they performed on the sands, when people are asked about Roman culture, many think about and refer to the bloody spectacles of men fighting to the death in the arena. Gladiatorial combat is often regarded as barbaric, and most find it very difficult to comprehend how people could have enjoyed watching something so violent, but nevertheless, the spectacle still intrigues and fascinates people today, whether in movies like Gladiator or television shows about Spartacus. Each match usually pitted one type of gladiator against a different type of gladiator, with each having their own kind of armor, weaponry and fighting style. For example, the retiarius was a gladiator that used a net, dagger and trident as his offensive weapons, while only wearing a protective guard over his left arm for protection. The retiarius would typically fight against the secutor, a gladiator armed with a sword, large shield, helmet and protective covering on his right arm and left leg. Therefore, a retiarius sacrificed armor for quickness in battle, while the secutor did the opposite. Although people often think of gladiators fighting to the death, the outcome of gladiatorial combats was not always fatal for one of the participants. If a gladiator fought well, the sponsor of the show could spare him, particularly if the crowd desired it. The fact that the outcome of matches was never the same and the crowd could help determine the result of the match certainly added to the Roman public's pleasure, making it a lot less surprising that such an abhorrent spectacle still fascinated the modern world.

Gladiatorial combat traces its origins back to the early Republican period from the 5th-3rd century B.C., but it's still unclear where these combats first appeared. Credit has been given to both the Etruscans in northern Italy and the Campanians in southern Italy, though the first recorded gladiatorial combat occurred in the 3rd century B.C. at the funeral of D. His sons organized a combat between three different pairs of gladiators who fought at their father's grave, but exactly what these first gladiatorial combats were supposed to represent remains unclear. Some believe that the spilling of human blood was a way of offering a sacrifice to the dead, while others suggest that the contests themselves were a funeral offering in honor of the dead. Gladiatorial combat began in the Republican period and was associated with death and burial, but due to its popularity it became an organized form of entertainment in the Imperial Age, and even as the gladiators were considered low class, they were also admired, leading to some Roman men and women volunteering to become gladiators. The Gladiator Alan Baker 2010-12-23 Alan Baker weaves an extraordinary, vivid picture of Roman life as his compelling and evocative history tells the story of Rome's most notable gladiators. They were condemned and feared by emperors, slaughtered and adored by the masses and worshipped by their female fans, yet their lives were invariably violently short. Whether their enemy was a starved tiger or a battle-hardened criminal, their numbered days were dark and bloody. Yet men gave up their wealth and freedom to become gladiators and noble-women gave up their positions to be with them. The *Gladiator* illuminates the extraordinary lives of Spartacus, Commodus, Eppia and others - bringing the same energy and passion to the page that Ridley Scott's cinematic triumph bough to the screen.

These first missionaries were largely Portuguese and predominantly Roman Catholic. During this age, many European Empires were beginning to transition from colonial expansion via conversion and missionary work to a more commercial approach. This thesis proposes to answer the following questions: Why and how was French missionary work so important to international relations between France and China? In what ways did this missionary work alter Chinese society? Did the French missionaries pave the way for China's future as a republic, and if so—how? What were the differences between France's Catholic missionaries and France's Protestant missionaries in China? Additionally, how might this missionary work compare to other notable examples, such as Spain's missionary work in South and Central America? It is hoped that this thesis will be able to answer these questions, as well as any others that reveal themselves over the course of study.

Of course, the main events in the Colosseum were gladiator fights. Gladiators are somewhat synonymous with ancient Rome, and even thousands of years after they performed on the sands, when people are asked about Roman culture, many think about and refer to the bloody spectacles of men fighting to the death in the arena. Gladiatorial combat is often regarded as barbaric, and most find it very difficult to comprehend how people could have enjoyed watching something so violent, but nevertheless, the spectacle still intrigues and fascinates people today, whether in movies like *Gladiator* or television shows about Spartacus. Each match usually pitted one type of gladiator against a different type of gladiator, with each having their own kind of armor, weaponry and fighting style. For example, the retiarius was a gladiator that used a net, dagger and trident as his offensive weapons, while only wearing a protective guard over his left arm for protection. The retiarius would typically fight against the secutor, a gladiator armed with a sword, large shield, helmet and protective covering on his right arm and left leg. Therefore, a retiarius sacrificed armor for quickness in battle, while the secutor did the opposite. Although people often think of gladiators fighting to the death, the outcome of gladiatorial combats was not always fatal for one of the participants. If a gladiator fought well, the sponsor of the show could spare him, particularly if the crowd desired it. The fact that the outcome of matches was never the same and the crowd could help determine the result of the match certainly added to the Roman public's pleasure, making it a lot less surprising that such an abhorrent spectacle still fascinated the modern world.

The Emperor Commodus John S. McHugh 2015-08-31 Commodus is synonymous with debauchery and megalomania, best remembered for fighting as a gladiator. Ridiculed and maligned by historians since his own time, modern popular culture knows him as the patricidal villain in Ridley Scott's *Gladiator*. Much of his infamy is clearly based on fact, but is this the full story?John McHugh reviews the ancient evidence to present the first full-length biography of Commodus in English. His twelve-year reign is set in its historical context, showing that the 'kingdom of gold' he supposedly inherited was actually an empire devastated by plague and war. Openly autocratic, Commodus compromised the privileges and vested interests of the senatorial clique, who therefore plotted to murder him. Surviving repeated conspiracies only convinced Commodus that he was under divine protection, increasingly identifying himself as Hercules incarnate. This and his antics in the arena allowed his senatorial enemies to present Commodus as a mad tyrant to justify his murder, which they finally succeeded in arranging by having him strangled by a wrestler.
