**Eating Soup without a Spoon** Jeffrey H. Cohen 2015-11-15 Significant scholarship exists on anthropological fieldwork and methodologies. Some anthropologists have also published memoirs of their research experiences. Renowned anthropologist Jeffrey Cohen's *Eating Soup without a Spoon* is a first-of-its-kind hybrid of the two, expertly melding story with methodology to create a compelling narrative of fieldwork that is deeply grounded in anthropological theory. Cohen's first foray into fieldwork was in 1992, when he lived in Santa Anna del Valle in rural Oaxaca, Mexico. While recounting his experiences studying how rural folks adapted to far-reaching economic changes, Cohen is candid about the mistakes he made and the struggles in the village. From the pressures of gaining the trust of a population to the fear of making errors in data collection, Cohen explores the intellectual processes behind ethnographic research. He offers tips for collecting data, avoiding pitfalls, and embracing the chaos and shocks that come with working in an unfamiliar environment. Cohen's own photographs enrich his vivid portrayals of daily life. In this groundbreaking work, Cohen discusses the adventure, wonder, community, and friendships he encountered during his first year of work, but, first and foremost, he writes in service to the field as a place to do research: to test ideas, develop theories, and model how humans cope and react to the world.

**International Practices to Promote Budget Literacy** Harika Masud 2017-06-28 Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-

to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

*The Prison Notebooks* Lorenzo Fusaro 2017-07-05 Antonio Gramsci's Prison Notebooks is a remarkable work, not only because it was written in jail as the Italian Marxist thinker fell victim to political oppression in his home country, but also because it shows his impressive analytical ability. First published in 1948, 11 years after Gramsci's death, Prison Notebooks ably demonstrates that the writer has an innate ability to understand the relationship between different parts of an argument. This is how Gramsci manages to analyze such wide-ranging topics - capitalism, economics and culture - to explain historical developments. He introduces the idea of "hegemony," the means by which ruling classes in a society gain, keep hold of and manage their power, and, by carefully looking at how society operates, he reveals the manner in which the powerful deploy a combination of force and manipulation to convince most people that the existing social arrangement is logical and in their best interests - even when it isn't. Gramsci shows exactly how the ruling class maintains power by influencing both political institutions like the courts and the police, and civil institutions, such as churches, family and schools. His powerful analysis led him to the conclusion that change can only take place in two ways, either through revolution or through a slow but constant struggle to transform the belief system of the ruling classes.

*European Notebooks* Francois Bondy 2018-02-06 A generation of outstanding European thinkers emerged out of the rubble of World War II. It was a group unparalleled in their probing of an age that had produced totalitarianism as a political norm, and the Holocaust as its supreme nightmarish achievement. Figures ranging from George Lichtheim, Ignazio Silone, Raymond Aron, Andrei Amalrik, among many others, found a home in Encounter. None stood taller or saw further than François Bondy of Zurich. In a moving tribute to his friend, Melvin J. Lasky, long-time editor of Encounter, writes, "Bondy was a breathtaking spectacle. I had known him to read and walk, to think and talk, all at once--and still make mental notes for his next article.... Early or late, seated or standing, awake or asleep, his incomparable spiritedness would always be darting from point to point, paying attention and idly wandering at once. Taken all in all, he still continues to represent for me perhaps a Henry Jamesian New Man." Bondy's essays themselves represent a broad sweep of major figures and events in the second half of the twentieth century. His spatial outreach went from Budapest to Tokyo and Paris. His political essays extended from George Kennan to Benito Mussolini. And his prime mÚtier, the cultural figures of Europe, covered Sartre, Kafka, Heidegger and Milosz. The analysis was uniformly fair minded but unstinting in its insights. Taken together, the variegated themes he raised in his work as a Zurich journalist, a Paris editor, and a

European homme de lettres sketch guidelines for an entrancing portrait of the intellectual as cosmopolitan. European Notebooks contains most of the articles that Bondy (1915-2003) wrote for Encounter under the stewardship of Stephen Spender, Irving Kristol, and then for the thirty years that Melvin Lasky served as editor. Bondy was that rare unattached intellectual, "free of every totalitarian temptation" and, as

Lasky notes, unfailing in his devotion to the liberties and civilities of a humane social order. European Notebooks offers a window into a civilization that came to maturity during the period in which these essays were written.
