Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling export of company names, human resources contacts, and addresses for mail merge and other uses.

**Web Based Energy Information and Control Systems** Barney L. Capehart 2021-02-28 Advances in new equipment, new processes, and new technology are the driving forces in improvements in energy management, energy efficiency and energy cost control. The purpose of this book is to document the operational experience with web

based systems in actual facilities and in varied applications, and to show how new opportunities have developed for energy and facility managers to quickly and effectively control and manage their operations. You'll find information on what is actually happening at other facilities, and see what is involved for current and future installations of internet-based technologies. The case studies and applications described should greatly assist energy, facility and maintenance managers, as well as consultants and control systems development engineers.
