*Lemon-Aid Used Cars and Trucks 2012-2013* Phil Edmonston 2012-05-19 Lemon-

Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used

car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Puncky Paul Heppner  
2015-08-21 With enlightening examples and illustrations drawn from counseling literature, RESEARCH DESIGN IN COUNSELING, 4th Edition facilitates a conceptual understanding of research design as well as the important role of science in counseling and counseling psychology today. In doing so, the text fully addresses the strengths and weaknesses of all of the major designs, and focuses on a broad array of methodological issues. In addition to introducing students to the existing scientific literature in counseling and counseling psychology, the authors address professional writing, ethics, and research training. Their evenhanded approach provides students with an understanding of the various types of research, including both quantitative and

qualitative approaches. Writing more than just a how-to book, the authors present a compelling rationale for the necessity of conducting research, and persuasively promote the necessity for greater integration of science and practice to enhance the effectiveness of both science and practice in counseling and counseling psychology.
