

# Journey Of The Universe Brian Swimme

Yeah, reviewing a books **Journey Of The Universe Brian Swimme** could grow your near contacts listings. This is just one of the solutions for you to be successful. As understood, talent does not recommend that you have fantastic points.

Comprehending as competently as promise even more than additional will pay for each success. next to, the declaration as without difficulty as sharpness of this Journey Of The Universe Brian Swimme can be taken as well as picked to act.

*Wie die Menschheit zur Sprache fand* Dean Falk 2010 Wie vor über zwei Millionen Jahren Sprache entstand Die Frage, wie es kommt, dass Menschen sprechen können, und ob sie dies seit Tausenden oder Millionen von Jahren tun, rührt an den Kern des Menschseins und sorgt immer wieder für leidenschaftliche Debatten. Hat sich die Sprache aus Tierlauten entwickelt oder aus Gesten? Ist Sprache als Werkzeug des Denkens entstanden? Aus der Beobachtung, dass Eltern fast überall auf der Welt mit ihrem Säugling in einer besonderen Babysprache reden, entwickelt die Anthropologin Dean Falk eine gänzlich neue Theorie vom Ursprung der Sprache: An ihrem Anfang - wie auch am Anfang der Musik - stand demnach der beruhigende, tröstende Singsang der Mütter, die ihre Kinder nicht zu allen Zeiten am Körper halten konnten. Ein Buch voll faszinierender Beobachtungen und Erkenntnisse zur Entwicklung des Menschen, seiner Kommunikation, der Musik und auch der Kunst.

*Älter als die Sterne* Karen C. Fox 2019-03

**Die Zukunft des Menschen** Pierre Teilhard de Chardin (Theologen, Philosophe, Paläontologiste) 1966

*Developing Ecological Consciousness* Christopher Uhl 2013 Developing Ecological Consciousness is a unique introduction to environmental studies. In Chistopher Uhl s view it is time to acknowledge the ways that our cultural conditioning leads to separation from self, other, and Earth. This book charts a three-step path for healing this separation, first, by revealing that Earth is our larger body; second, by detailing the sickening state of our Earth body; and, third, by offering the tools necessary for healing both ourselves and Earth.\*

**Die großen Fragen - Gott** Mark Vernon 2015-04-13 Die großen Fragen behandeln grundlegende Probleme und Konzepte in Wissenschaft und Philosophie, die Forscher und Denker seit jeher umtreiben. Anspruch der ambitionierten Reihe ist es, die Antworten auf diese Fragen zu präsentieren und damit die wichtigsten Gedanken der Menschheit in einzigartigen Übersichten zu bündeln. Im vorliegenden Band Gott widmet sich Mark Vernon 20 bedeutenden Fragen zu Glaube, Religion und Spiritualität.

**Cosmogensis** Brian Thomas Swimme 2022-11-15 From the host and cocreator of PBS’s Journey of the Universe, a fresh look at how the rich collision between science and spirituality has influenced contemporary consciousness The understanding that the universe has been expanding since its fiery beginning 14 billion years ago and has developed into stars, galaxies, life, and human consciousness is one of the most significant in human history. It is taught throughout the world and has become our common creation story for nearly every culture. In terms of the universe’s development, we humans are not only economic, religious, or political beings. At the most fundamental level, we are cosmological beings. Cosmogensis is one of the greatest discoveries in human history, and it continues to have a profound impact on humanity. And yet most science books do not explore the effects it has had on our individual minds. In Cosmogensis, Brian Thomas Swimme narrates the same cosmological events that we agree are fact but offers a feature unlike all other writings on this topic. He tells the story of the universe while simultaneously telling the story of the storyteller. Swimme describes how the impact of this new story deconstructed his mind then reassembled it, offering us a glimpse into how cosmogenesis has transformed our understanding of both the universe and the evolution of human consciousness itself. **Spindrift** Peter Reason 2016-11-21 This is the story of a sailing odyssey, but also of an inward journey into deep truths about who we are and how we belong in the universal scheme. A meditation on sailing and life, it is a hugely enjoyable and thought-provoking book for landlubbers, sailors, philosophers and naturalists alike. Mostly sailing alone, Peter Reason invites us to share in the minute-by-minute challenges of seamanship and navigation, on his journey in his yacht Coral from Plymouth across the Celtic Sea and back again. Exploring far more than the seaways, the author successfully manages to tell the story of a journey with another dimension - that of investigating and reflecting on our human place in the ecology of the planet. Above all, this book shows us that Nature is not just a place to visit, but our home.

**This Sacred Life** Norman Wirzba 2021-10-31 This Sacred Life redescrbes the meaning of this world and the value and purpose of human life within it.

**Consecrating Science** Lisa H. Sideris 2017-08-15 ‘In Consecrating Science, Lisa Sideris offers a searing critique of ‘The New Cosmology,’ a complex network of overlapping movements that claim to bring together science and spirituality, all in the name of saving our planet from impending ecological collapse. Highly regarded in many academic circles, these movements have been endorsed by numerous prominent scholars, scientists, historians, and educators. Their express goal–popularized in numerous books, films, TED talks, YouTube videos, podcasts, and even introductory courses at places like Harvard or Washington University–is to instill in readers and audiences a profound sense of being at home in the universe, thereby fostering environmentally responsible behavior. Whether promoted as ‘The New Story,’ ‘The Universe Story,’ or ‘The Epic of Evolution,’ they all offer humanity a new sacred story, a common creation myth for modern times and for all people: the evolutionary unfolding of the universe from the Big Bang to the present. Evolutionary science and religious cosmology –together at last! But as Sideris shows, however, the New Cosmology actually underwrites a staggering anthropocentric vision of the world. Instead of cultivating an ethic of respect for nature, the project of ‘consecrating science’ only increases human arrogance and indifference to nonhuman life. Going back to the work of Rachel Carson and other naturalists, the author shows how a sense of wonder, rooted in the natural world and our own ethical impulses, helps foster environmental attitudes and policies that protect our planet’--Provided by publish

**The Intellectual Journey of Thomas Berry** Heather Eaton 2014-04-02 Thomas Berry was an intellectual giant and cultural visionary of extraordinary stature. His vast knowledge of history, religions, and expertise as a cultural historian, united with his concern for the future of the planet is a unique blend revealing a genuine original thinker. Many know of his proposal for a new story, and a vital Earth sensitive spirituality. Few know the intellectual journey, because he presented his thoughts as a seamless and studied synthesis. This book is about the intellectual journey of Thomas Berry: of the roots and insights that are hidden within his ecological, spiritual proposal.

**The Universe Story Calendar 2018 CE** Thomas R. Spiritbringer 2017-11-09 Now, at this time of Great Promise and Great Peril, the Human Family needs our first The Universe Story Calendar 2018 CE, an actual 15 month calendar, to bring reality, meaning and value to our World and Earth-wide yearly calendar. The Universe Story Calendar transcends, includes and updates The Gregorian Calendar whose 435 years from 1582-2017 CE (Common Era) we give deep gratitude today. The Universe Story Calendar is based on evidential, scientific cosmology, As of Today, that follows the actuality that Earth revolves around the Sun, not the other way around, like when The Gregorian Calendar was instituted in 1582 CE. The Days of the Week are updated to tell The Universe Story to Humanity, not old inaccurate stories of personifed planets, goddesses and gods. The Months of the Year have been updated with new names by using The Universe Story book chapter titles to again, tell The Universe Story in 12 stages, so our species can see the wonder and beauty of this New Story while understanding our need to become a mutually enhancing presence on Earth instead of our current destructive one.In the Foreward to The Universe Story Calendar book, a companion to this calendar, author Brian Thomas Swimme says “We too have our calendars. Unfortunately, these calendars were fixed in the 16th century and carry what our recent ancestors regarded as important. They have not evolved with our deepening understanding of the universe.” This new calendar, promulgated on Univeseday, Nov./NationScience 9 of 2017 CE Year of The Universe Story guides Humanity toward Unity Consciousness.

**Soulcraft** Bill Plotkin 2005

**Christ in All Things** King, Ursula 2016-11-17

**God is Green** Bob Shore-Goss 2016-10-28 At this time of climate crisis, here is a practical Christian ecospirituality. It emerges from the pastoral and theological experience of Reverend Robert Shore-Goss, who worked with his congregation by making the earth a member of the church, by greening worship, and by helping the church building and operations attain a carbon neutral footprint. Shore-Goss explores an ecospirituality grounded in incarnational compassion. Practicing incarnational compassion means following the lived praxis of Jesus and the commission of the risen Christ as Gardener. Jesus becomes the "green face of God." Restrictive Christian spiritualities that exclude the earth as an original blessing of God must expand. This expansion leads to the realization that the incarnation of Christ has deep roots in the earth and the fleshly or biological tissue of life. This book aims to foster ecological conversation in churches and outlines the following practices for congregations: meditating on nature, inviting sermons on green topics, covenanting with the earth, and retrieving the natural elements of the sacraments. These practices help us recover ourselves as fleshly members of the earth and the network of life. If we fall in love with God’s creation, says Shore-Goss, we will fight against climate change.

**After the Death of Nature** Kenneth Worthy 2018-10-22 Carolyn Merchant’s foundational 1980 book The Death of Nature: Women, Ecology, and the Scientific Revolution established her as a pioneering researcher of human-nature relations. Her subsequent groundbreaking writing in a dozen books and over one hundred peer-reviewed articles have only fortified her position as one of the most influential scholars of the environment. This book examines and builds upon her decades-long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women as well as her systematic taxonomies of environmental thought and action. Seventeen scholars and activists praise, praise, criticize, and extend Merchant’s work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future. Their contributions offer personal observations of Merchant’s influence on the teaching, research, and careers of other environmentalists.

*The Universe Story* Brian Swimme 1994-03-11 From the big bang to the present and into the next millenium, The Universe Story unites science and the humanities in a dramatic exploration of the unfolding of the universe, humanity’s evolving place in the cosmos, and the boundless possibilities for our future.

*Dangerous Years* David W. Orr 2016-01-01 Considers future of civilization in the light of what we know about climate change and related threats. David Orr, an award-winning, internationally recognized leader in the field of sustainability and environmental education, pulls no punches: even with the Paris Agreement of 2015, Earth systems will not reach a new equilibrium for centuries. Earth is becoming a different planet, more threadbare and less biologically diverse, with more acidic oceans and a hotter, more capricious climate. Furthermore, technology will not solve complex problems of sustainability.

**Journey of the Universe** Brian Thomas Swimme 2012-06-30

*Denkweisen* Alfred North Whitehead 2001

**Eucharistic Body** Frank C. Senn 2017-08-15 Building on his previous work on embodied liturgy, Frank C. Senn explores the relationship between the sacramental body and blood of Christ, the ecclesial body of Christ, and the body of the communicant. Drawing on the richness of the eucharistic traditions and his own life experiences, this book expands our understandings of the Eucharist to include pilgrimage to the altar (ad altare Dei), a life of gratitude (anaphora), cosmology and praise (preface and Sanctus), body and memory (anamnesis), Spirit and community (epiclesis), Trinitarian orthodoxy and world view (doxology), presence and union with Christ (communion), and initiation and reconciliation (fencing the table). It argues for use of a full eucharistic prayer to express a wider understanding of the Eucharist, including creation themes, an emphasis on the passion of Christ to connect the Eucharist to suffering humanity, an expansion of the fellowship dimension of the Eucharist to embrace the church in heaven and around the world, a recovery of Trinitarian praise, an ecumenical exploration of how we understand theologically the presence of Christ received bodily, and a reconsideration of the value of initiation in sacramental discipline and in the life of faith.

**Listening Is Learning** Frank Thoms 2018-12-21 Listening is Learning invites young teachers to seek the knowledge and advice of former teachers, retired educators, respected veterans, and fellow newcomers. It encourages them to step away from their isolated classrooms and search for best ideas, methods, materials, insights—and moments of success, epiphanies, struggles, methodologies.

**Living Cosmology** Tucker, Mary Evelyn 2016-04-13

*Spiritual Ecology: A Quiet Revolution* Leslie E. Sponsel 2012-07-19 A prominent scientist and scholar documents and explains the thoughts, actions, and legacies of spiritual ecology’s pioneers from ancient times to the present, demonstrating how the movement may offer the last chance to restore a healthy relationship between humankind and nature. • Clear, concise, and captivating essays on well-known, as well as little-known, pioneers in spiritual ecology • Chapter-long treatment of each individual’s contributions, allowing for in-depth coverage • An extensive resource guide, including films and websites • An appendix listing approximately 100 pioneers in spiritual ecology

**The Cosmic Vision of Teilhard de Chardin** Haught, John F. 2021-12-15

**Linking Ecology and Ethics for a Changing World** Ricardo Rozzi 2014-02-06 To comprehensively address the complexities of current socio-ecological problems involved in global environmental change, it is indispsible to achieve an integration of ecological understanding and ethical values. Contemporary science proposes an inclusive ecosystem concept that recognizes humans as components. Contemporary environmental ethics includes eco-social justice and the realization that as important as biodiversity is cultural diversity, inter-cultural, inter-institutional, and international collaboration requiring a novel approach known as biocultural conservation. Right action in confronting the challenges of the

21st century requires science and ethics to be seamlessly integrated. This book resulted from the 14th Cary Conference that brought together leading scholars and practitioners in ecology and environmental philosophy to discuss core terminologies, methods, questions, and practical frameworks for long-term socio-ecological research, education, and decision making.

**Whole Earth Thinking and Planetary Coexistence** Sam Mickey 2015-07-16 Like never before in history, humans are becoming increasingly interconnected with one another and with the other inhabitants and habitats of Earth. There are numerous signs of planetary interrelations, from social media and international trade to genetic engineering and global climate change. The scientific study of interrelations between organisms and environments, Ecology, is uniquely capable of addressing the complex challenges that characterize our era of planetary coexistence. Whole Earth Thinking and Planetary Coexistence focuses on newly emerging approaches to ecology that cross the disciplinary boundaries of sciences and humanities with the aim of responding to the challenges facing the current era of planetary interconnectedness. It introduces concepts that draw out a creative contrast between religious and secular approaches to the integration of sciences and humanities, with religious approaches represented by the "geologian" Thomas Berry and the whole Earth thinking of Stephanie Kaza and Gary Snyder, and the more secular approaches represented by the "geophilosophy" of poststructuralist theorists Gilles Deleuze and Félix Guattari. This book will introduce concepts engaging with the ecological challenges of planetary coexistence to students and professionals in fields of environmental studies, philosophy and religious studies.

**Thomas Berry** Mary Evelyn Tucker 2019-06-04 Thomas Berry (1914–2009) was one of the twentieth century’s most prescient and profound thinkers. As a cultural historian, he sought a broader perspective on humanity’s relationship to the earth in order to respond to the ecological and social challenges of our times. This first biography of Berry illuminates his remarkable vision and its continuing relevance for achieving transformative social change and environmental renewal. Berry began his studies in Western history and religions and then expanded to include Asian and indigenous religions, which he taught at Fordham University, Barnard College, and Columbia University. Drawing on his explorations of history, he came to see the evolutionary process as a story that could help restore the continuity of humans with the natural world. Berry urged humans to recognize their place on a planet with complex ecosystems in a vast, evolving universe. He sought to replace the modern alienation from nature with a sense of intimacy and responsibility. Berry called for new forms of ecological education, law, and spirituality, as well as the creation of resilient agricultural systems, bioregions, and ecocities. At a time of growing environmental crisis, this biography shows the ongoing significance of Berry’s conception of human interdependence with the earth as part of the unfolding journey of the universe. **Change the Story, Change the Future** David C. Korten 2015-02-02 We humans live by stories, says David Korten, and the stories that now govern our society set us on a path to certain self-destruction. In this profound new book, Korten shares the results of his search for a story that reflects the fullness of human knowledge and understanding and provides a guide to action adequate to the needs of our time. Korten calls our current story Sacred Money and Markets. Money, it tells us, is the measure of all worth and the source of all happiness. Earth is simply a source of raw materials. Inequality and environmental destruction are unfortunate but unavoidable. Although many recognize that this story promotes bad ethics, bad science, and bad economics, it will remain our guiding story until replaced by one that aligns with our deepest understanding of the universe and our relationship to it. To guide our path to a viable human future, Korten offers a Sacred Life and Living Earth story grounded in a cosmology that affirms we are living beings born of a living Earth itself born of a living universe. Our health and well-being depend on an economy that works in partnership with the processes by which Earth’s community of life maintains the conditions of its own existence—and ours. Offering a hopeful vision, Korten lays out the transformative impact adopting this story will have on every aspect of human life and

**Co-cityniting Ecological and Economic Collapse**

**Ecospirituality** Rachel Wheeler 2022-02-08 Ecospirituality comprehensively introduces and lays the foundation for further individual growth in the burgeoning field of ecospirituality. This book is not only a foundation-laying tool for educators, but also a concise, thorough way for students and other individuals to gain a comprehensive understanding of ecospirituality and why it matters.

**Journey of the Universe** Brian Thomas Swimme 2011-06-28 The authors tell the epic story of the universe from an inspired new perspective, weaving the findings of modern science together with enduring wisdom found in the humanistic traditions of the West, China, India, and indigenous peoples. This book is part of a larger project that includes a documentary film, educational DVD series, and Web site.

Laura Westra 2013-06-07 From the first appearance of the term in law in the Clean Water Act of 1972 (US), ecological integrity has been debated by a wide range of researchers, including biologists, ecologists, philosophers, legal scholars, doctors and epidemiologists, whose joint interest was the study and understanding of ecological/biological integrity from various standpoints and disciplines. This volume discusses the need for ecological integrity as a major guiding principle in a variety of policy areas, to counter the present ecological and economic crises with their multiple effects on human rights. The book celebrates the 20th anniversary of the Global Ecological Integrity Group and reassesses the basic concept of ecological integrity in order to show how a future beyond catastrophe and disaster is in fact possible, but only if civil society and ultimately legal regimes acknowledge the necessity to consider ecointegrity as a primary factor in decision-making. This is key to the support of basic rights to clean air and water, for halting climate change, and also the basic rights of women and indigenous people. As the authors clearly show, all these rights ultimately depend upon accepting policies that acknowledge the pivotal role of ecological integrity.

**Earth Jurisprudence** Peter D. Burdon 2014-09-19 The idea of human dominion over nature has become entrenched by the dominant rights-based interpretation of private property. Accordingly, nature is not attributed any inherent value and becomes merely the matter of a human property relationship. Earth Jurisprudence: Private Property and the Environment explores how an alternative conception of property might be instead grounded in the eccentric concept of an Earth community. Recognising that human beings are deeply interconnected with and dependent on nature, this concept is proposed as a standard and measure for human law. This book argues that the anthropocentric institution of private property needs to be reconceived; drawing on international case law, indigenous views of property and the land use practices of agrarian communities, Peter Burdon considers how private property can be reformulated in a way that fosters duties towards nature. Using the theory of earth jurisprudence as a guide, he outlines an alternative eccentric description of private property as a relationship between and among members of the Earth community. This book will appeal to

**Big's History: Big in World** justice and ecology, as well as anyone pursuing an interest more particularly in earth jurisprudence.

**Spirituelle Ökologie** Llewellyn Vaughan-Lee 2015-07-10 Diese brandaktuelle Sammlung von Essays, geschrieben von Leitfiguren der Spiritualität und des Umweltschutzes rund um die Welt, beleuchtet den grundlegenden Zusammenhang unserer gegenwärtigen ökologischen Krise mit unserem fehlenden Bewusstsein für die lebendige Erde. Die Beiträge zeigen, wie die Menschheit ihre Beziehung zur Erde wandeln und erneuern kann. Sie liefern uns die dringend nötige spirituelle Antwort auf die Krisen unserer Zeit. Versammelt sind hier Sichtweisen aus dem Buddhismus, dem Sufismus, dem Christentum und von amerikanischen Ureinwohnern ebenso, wie jene von Physikern, Psychologen und anderen Wissenschaftlern. Alle zusammen ergeben ein rundes Bild und einen Aufruf zum Handeln: Der Mensch muss sich wieder mit der Erde verbinden, ganz gleich, aus welcher Tradition er kommt.

Cynthia Stokes Brown 2016-12-30 The newest way to think about the universe becomes engaging and personal in Big History, Small World: From the Big Bang to You by Cynthia Stokes Brown. Her clear introduction to big history, divided into eight thresholds of time, is the perfect starting point for any reader intrigued by this rich blend of history and science. Big History, Small World is also the first book about big history specifically designed to be used in high school courses and with the free curriculum available from the Big History Project cofounded by Bill Gates and David Christian. Big History, Small World is organized into twelve chapters. In the first chapter, Brown discusses the scientific method. In the last chapter she discusses the different ways people interpret big history and find meaning in it. The other ten chapters are based on eight major turning points, or thresholds, in the cosmic story. One threshold, the emergence of life, gets two chapters, while a discussion of the future fills chapter eleven. This book is not formatted as a traditional textbook, although it can easily be used as one. Each chapter has questions on the frontier of knowledge, as well as suggestions of how the content applies directly to the reader, to answer the perennial question: “Why do I have to learn this?” There are illustrations, charts, diagrams, a glossary and timeline, and short biographies of scientists and historians who have been influential in developing big history. Cynthia Stokes Brown has taught world history in high-school and trained high-school teachers at Dominican University of California, where she piloted big history courses and helped initiate the big history program now required for all freshmen. She is the author of the general-interest book on big history, Big History: From the Big Bang to the Present (New York: New Press, 2nd ed. 2012) and also wrote a university-level textbook with David Christian and Craig Benjamin, Big History: Between Nothing and Everything (New York: McGraw-Hill, 2014). She is a founding member of the International Big History Association and associate editor of its publication, Origins.

**Das Universum ist ein grüner Drache** Brian Swimme 2016-01-26 Physik, Mystik, Poesie - ein Dialog über die Einheit allen Seins, der dem Leser seinen Platz im Kosmos in unvergleichlicher Weise aufzeigt. Ein Meisterwerk! Der Physiker und Kosmologe Brian Swimme spannt einen großen Bogen von der Entstehung des Universums bis in unseren Alltag hinein - verständlich, nachvollziehbar und in tiefster Weise berührend.

**Das Böse** Paul Ricoeur 2006-01-01 Woher kommt das Böse? Wie kommt es, dass wir Böses tun? Diese Fragen haben Paul Ricoeur (1913-2005) - den Philosophen und Theologen, der sich selbst nie als solchen bezeichnet hat - seit seinen frühesten Arbeiten begleitet. Der vorliegende Essay, entstanden aus einem Referat, das Ricoeur 1985 an der Theologischen Fakultät Lausanne gehalten hat, kann stellvertretend für seine Beschäftigung mit diesen Fragen stehen. Angesichts dessen, was das 20. Jahrhundert an Bösem hervorgebracht hat, beleuchtet Ricoeur hier in einer exemplarischen Tiefe die verschiedenen religiösen, mythologischen und philosophischen Diskurse über das Böse. Er zeigt, wie die traditionelle Theodizee, aber auch wie Kant, Hegel oder Barth versucht haben, das Böse, das die Existenz des Bösen bedeutet, zu lösen. Ricoeur selbst pladiert für eine Weisheit, die auf die (An-)Klage verzichtet. Paul Ricoeur, 1913-2005, französischer Philosoph, war zuletzt Professor an der Universitat Paris-Nanterre und Lehrstuhlnachfolger von Paul Tillich an der University of Chicago. Neben existenz- und geschichtsphilosophischen Forschungen widmete er sich intensiv dem Problem der Sprache.

**Posthuman Legal Subjectivity** Jana Norman 2021-08-12 This book provides a reimaging of how Western law and legal theory structures the human–earth relationship. As a complement to contemporary efforts to establish rights of nature and non-human legal personhood, this book focuses on the other subject in the human–earth relationship: the human. Critical ecological feminism exposes the dualistic nature of the ideal human legal subject as a key driver in the dynamic of ~~the natural world~~ that characterises the human–earth relationship in Western culture. This book draws on conceptual fields associated with the new sciences, including new materialism, posthuman critical theory and Big History, to demonstrate that the naturalised hierarchy of humans over nature in the Western social imaginary is anything but natural. It then sets about constructing a counternarrative. The proposed ‘Cosmic Person’ as alternative, non-dualised human legal subject forges a pathway for transforming the Western cultural understanding of the human–earth relationship from mastery and control to ideal co-habitation. Finally, the book details a case study, highlighting the practical application of the proposed reconceptualisation of the human legal subject to contemporary environmental issues. This original and important analysis of the legal status of the human in the Anthropocene will be of great interest to those working in legal theory, jurisprudence, environmental law and the environmental humanities; as well as those with relevant interests in gender studies, cultural studies, feminist theory, critical theory and philosophy.

David Steindl-Rast 2010

**Die Seele im 20. Jahrhundert** Kocku von Stuckrad 2019-07-15 Von den Wissenschaften weitgehend vergessen, doch allgegenwärtig in der heutigen Kultur: Die Seele. Wie ist dieser "Seelenverlust" zu erklären, und wie kommt es, dass die Seele heute wieder so populär ist? Das Buch erzählt die faszinierende Geschichte der Seele im 20. Jahrhundert aus kulturwissenschaftlicher Sicht. Zu Beginn des Jahrhunderts fester Bestandteil kultureller Debatten zwischen Psychologie, Philosophie, Religionswissenschaft, Literatur und Politik, erfuhr die Seele nach 1950 einen großen Aufschwung außerhalb der Universitäten und wurde zum zentralen Bezugspunkt populärer Kultur – von alternativen Therapieformen bis hin zu Literatur, Film, neuen spirituellen Bewegungen sowie ökologischen und politischen Programmen. Die Analyse zeigt, dass Seelenkonzepte wichtige Träger von Religion in einer nur scheinbar säkularisierten Moderne sind. **Teaching Big History** Richard B. Simon 2014-12-23 Big History is a new field on a grand scale: it tells the story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them. Teaching Big History is a powerful analytic and pedagogical resource, and serves as a comprehensive guide for teaching Big History, as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging first-hand account of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike.
