Christianity Across Borders Gemma Tulud Cruz 2021-07-29 This book offers a comprehensive exploration of key issues in contemporary global migration and considers the theological implications for Christianity, in general, and for

Christian faith and practice in various parts of the world, in particular. Migrant Christians, who make up the majority of believers on the move and in diaspora, play an increasingly vital role in world Christianity today. Drawing on cases from across the globe, Gemma Tulud

Cruz considers how Christians are faced with immense gifts and tremendous challenges brought by the ever-increasing presence of migrants in their midst and the conditions that characterize contemporary global migration. Migrant Christians themselves face multiple challenges, which have been made more stark by the coronavirus pandemic. The volume will be relevant to scholars of religion and of migration who are interested in a closer examination of what happens to Christians and Christianity, (faith) communities, and nation-states in the age of migration.

Microeconomic Policy Clement Allan

Tisdell 2008-01-01 The new and updated edition of Microeconomic Policy provides an excellent blend of theory and application to foster understanding of economic-based policy making. The book is eclectic in its approach and addresses a rich set of current applications. It is an ideal book for teaching microeconomic-based policy analysis to students. Todd Sandler, University of Texas at Dallas, US Designed for students who have already encountered the microeconomic principles, this valuable text focusses effectively on their policy implications, imbuing the apparently dry theory with its insights for the general welfare. William J. Baumol, New York University, US and Princeton University, US A distinctive feature of this book is the application of microeconomics to public policy. As to be expected given the international reputation of the authors there is a thorough treatment

of global environmental policies, including the Stern Report, and a very useful chapter on issues of defence, conflict and terrorism. What this text offers, and most competing books do not is the breadth of coverage. In this revised edition we have integration into the topics of advances in behavioural, evolutionary and Austrian economics. The relevance to business management and government policy of the material presented makes the subject come alive in application. . . a refreshing change from the curve-shifting that dominates traditional microeconomic texts which turns-off so many of our students and prevents them from seeing the crucial importance of economics to almost every aspect of our well-being. John Lodewijks, University of Western Sydney, Australia This thoroughly accessible textbook shows students how microeconomic theory can be used and applied to major issues of public

policy. In this way, it will improve their understanding of both microeconomic theory and policy and also develop their ability to critically assess them. Clem Tisdell and Keith Hartley have expanded upon their previous successful work on microeconomics. As a result, this new book is considerably updated with substantial chapter revisions, as well as new chapters dealing with business management, ownership, environmental issues, public choice, defence, conflict and terrorism. Promoting a thorough understanding of this complex yet fundamental topic, *Microeconomic Policy: A New Perspective* will undoubtedly prove an invaluable textbook for all students, academics and researchers of economics and public policy.

Blessing and Curse of Intra-EU

Mobility Christiane Heimann

2020-09-29 Christiane Heimann provides insights on how the economic and political situation in Spain, Germany and the UK affects the institutional implementation of free labour movement and how mobile EU citizens navigate the institutional policies strategically. The study examines different profiles of EU citizens exercising free labour movement and shows ways of EU labour recruitment and transnational labour integration taking into account the institutional implementation of related EU policies. Intra-Community mobility policies and practices will be assessed in terms of their effectiveness for international recruitment and labour integration. Labour, Mobility and Temporary Migration Julie Knight 2017-06-15 Labour, Mobility and Temporary Migration delves into sociological

research on Polish migrants who migrated to the lesser-explored South Wales region after Poland joined the European Union in 2004. At the time of enlargement, Polish migrants were characterised as being economically motivated, short-term migrants who would enter the UK for work purposes, save money and return home. However, over ten years after enlargement, this initial characterisation has been challenged with many of the once considered 'short-term' Poles remaining in the UK. In the case of Wales, the long-term impact of this migration is only starting to be fully realised, particularly in consideration of the different spatial areas - urban, semi-urban and rural - explored in this book. Such impact is occurring in the post-Brexit referendum period, a time when the UK's position in the EU is itself complex and changing.

A Web-Based Approach to Measure Skill Mismatches and Skills Profiles for a Developing Country: Jeisson Arley

Cárdenas Rubio 2020-12-30 "Several interdisciplinary studies highlight imperfect information as a possible explanation of skill mismatches, which in turn has implications for unemployment and informality rates. Despite information failures and their consequences, countries like Colombia (where informality and unemployment rates are high) lack a proper labour market information system to identify skill mismatches

and employer skill requirements. One reason for this absence is the cost of collecting labour market data. Recently, the potential use of online job portals as a source of labour market information has gained the attention of researchers and policymakers, since these portals can provide quick and relatively low-cost data collection. As such, these portals could be of use for Colombia. However, debates continue about the efficacy of this use, particularly concerning the robustness of the collected data. This book implements a novel mixed-methods approach (such as web scraping, text mining, machine learning, etc.) to investigate to what extent a web-based model of skill mismatches can be developed for Colombia. The main contribution of this book is demonstrating that, with the proper techniques, job portals can be a robust source of labour market information. In doing so, it also contributes to current knowledge

by developing a conceptual and methodological approach to identify skills, occupations, and skill mismatches using online job advertisements, which would otherwise be too complex to be collected and analysed via other means. By applying this novel methodology, this study provides new empirical data on the extent and nature of skill mismatches in Colombia for a considerable set of non-agricultural occupations in the urban and formal economy. Moreover, this information can be used as a complement to household surveys to monitor potential skill shortages. Thus, the findings are useful for policymakers, statisticians, and education and training providers, among others."

The "People Power" Disability - Serious Illness - Senior Citizen Superbook: Book 5. Disability Jobs (Most Disabled People Want to Work)

Tony Kelbrat 2014-04-01 The Americans with Disabilities Act (ADA),

prohibits private business and government agencies with 15 or more employees from discriminating against a qualified handicapped person in all manner of the employment process from hiring to performance to termination. Employers are allowed to ask prospective employees about their ability to perform a specific job function but they're not allowed to ask them about their disabilities per se. Reasonable accommodation for disabled job applicants refers to not asking embarrassing questions during the interview and also to make reasonable physical accommodations. Regardless of the particular disability, be it mobility limitation, sight or hearing impairment or a chronic condition like multiple sclerosis, the company is supposed to provide assistance in all these matters. This might be to provide a sign language reader, provide a reading enlarger machine for the visually impaired or build a

ramp to enable a wheelchair user to enter the building.

Globalization, Industrialization and Labour Markets in East and South Asia

Rajah Rasiah 2017-10-02 Among the key debates fought in developing economies is whether globalization through liberalization is the means by which economies can industrialize and provide their labour forces with tangible improvements in the material conditions of living. This book addresses this issue head on, using empirical evidence from some of the fastest growing and transition economies from East and South Asia. Countries such as the Philippines and Malaysia have already started to deindustrialize before enjoying industrial maturity, while with the exception of China and evidence of some growth in real wages in the other economies, the evidence appears compelling to suggest that increased industrialization and integration into the capitalist economy have not

succeeded in providing significant labour improvement. The evidence suggests that a proactive state, focusing on enhancing the material conditions of labour, is pertinent to ensuring sustainable long term industrialization and thus improving material conditions for workers. This book was originally published as a special issue of the Journal of the Asia Pacific Economy.

Management provides a comprehensive overview of management and business processes and practices in Japanese companies. The contributors combine theoretical findings and research results with a practical and contemporary view on how corporations and firms are managed in Japan. The handbook is divided into eight sections covering: historical perspectives on Japanese management; structure and theory of the Japanese firm; the corporate environment in Japan; the Japanese work environment; the Japanese market; manufacturing and logistics; interaction and communication; the future of Japanese management. This book is an essential reference resource for students and scholars working on Japanese companies, the Japanese market-place, Japanese consumers, or management processes in the Japanese firm. The book also provides an interesting and informative read for managers who need to deepen their knowledge on

Japanese business processes.

Costs and Benefits of Cross-country Labour Migration in the GMS

Hossein Jalilian 2012 International labour migration can be characterized in three ways - as human aspiration, tradition, and necessity. For some people, working overseas is a dream. For others, international labour mobility is a tradition. For a great number of people however, international labour migration is an economic necessity. It is the only viable solution to realize their basic human right to a decent life. GMS worker movements to Thailand typify all three characterizations of international labour mobility. While this book focuses on the economic dimensions of international labour emigration, principally from Cambodia, Laos and Vietnam to Thailand, it recognizes at the very outset the equal standing of non-economic motivations for migration. *Labour Migration in Asia*

International Organization for Migration 2005 This is the second volume of Labour Migration in Asia. This volume describes and makes an assessment of specific initiatives in selected countries of origin to (1) protect migrant workers through the regulation of recruitment and setting of minimum standards in employment contracts; (2) provide support services to migrant workers through pre-departure orientation and a welfare fund, and (3) enhance the development benefits of labour migration through training, skills development and remittances. The articles are written by labour migration specialists and practitioners from the countries concerned and have been commissioned by IOM, the Department for International Development and the Asian Development Bank. *Strategic Business Services* OECD 1999-09-13 This book presents 21 country case studies on strategic

a global context of international education policy, it examines changes from New Labour policies under Tony Blair's Prime Minister's Initiative, to the more recent Coalition and Conservative Government policies in the International Education Strategy. The research uses a text-based approach to primary research, adopting a critical framework developed by Carol Bacchi ('what is the problem represented to be?'). The book argues that international student policy can be reduced to reasons for and against recruiting international students; in doing so, students are represented as ambassadors for the UK or tools in its public diplomacy, consumers and generators of reputation, means to get money, and as migrants of questionable legitimacy. These homogenizing representations have the potential to shape international education, implicating academics as agents of policy, and infringing on

students' self-formation. The book will be compelling reading for students and researchers in the fields of education and sociology, as well as those interested in education policy-making.

Managing To Change? M. White

2004-05-13 This book presents new and authoritative evidence about change at the workplace, using it to cast light on recent debates about the future of work. The basic questions it poses are whether, and how, British workplaces are responding to the challenge of change, and what are the implications of change both for managers and employees. Using up-to-date information from 2000 workplaces, it provides a realistic basis for envisaging the changes through the first decade of the 21st century. It is accessible to a wide audience of policy makers, managers, professionals, students and academics.

implementation of reforms in Sri Lanka, particularly after economic liberalization in 1977. The author maintains that it is a case of development under stress where the outcome has been far below the country's potential. The book describes key features of the Sri Lankan socio-political and economic system that prevented the country from achieving higher levels of economic growth. It explains why it could not match the economic achievements of South Korea and Malaysia-countries that had similar per capita income levels to that of Sri Lanka in the 1950s. The book is divided into five parts. The first part examines 50 years of economic development and the challenges ahead; the second discusses the economic liberalization debate; the third part looks at macroeconomic management during difficult times; the fourth looks at sectoral issues with reference to industry and

agriculture; and the final part examines employment and poverty.
