Das Gilgamesch-Epos Stefan M. Maul 2012-09-28

Der Heidelberger Assyriologe Stefan M. Maul legt hier eine neue Übersetzung des Gilgamesch-Epos

vor. Spektakuläre Textfunde, die in diesem Buch erstmals bekannt gemacht werden, und behutsam vorgenommene Ergänzungen lassen das älteste Werk der Weltliteratur in nie zuvor gesehener Vollständigkeit wiedererstehen. Die elegante und dennoch wortgetreue Übersetzung bewahrt die Sprachgewalt des babylonischen Originaltextes. Der leicht rhythmische Klang der Übertragung lädt zum Deklamieren ein und nähert sich den rhythmischen Versen der Vorlage an. In der allgemeinverständlichen Einführung und den ausführlichen Kommentaren nimmt Stefan M. Maul den Leser mit in die Welt des Alten Orients und erläutert ihm die politischen, gesellschaftlichen und religiösen Vorstellungen der Kultur, die das Gilgamesch-Epos hervorgebracht hat. Das Epos erzählt den Mythos des Königs Gilgamesch von Uruk, der seine Kräfte mit der ganzen Welt messen will, nach der Unsterblichkeit strebt und schließlich auf die Erkenntnis zurückgeworfen wird, daß auch für ihn das Leben endlich ist. Bis Gilgamesch bereit ist,

diese Lehre anzunehmen, und dadurch die Fähigkeit erwirbt, ein guter Herrscher zu sein, muß er zahllose Abenteuer bestehen. Das Gilgamesch-Epos ist so einem modernen Entwicklungsroman vergleichbar, der von den Grundfragen des menschlichen Daseins handelt.

Resources for Teaching Middle School

Science Smithsonian Institution 1998-03-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them.

Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of

Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area--Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type--core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate

the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed--and the only guide of its kind--Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists,

advocates of hands-on science teaching, and concerned parents.
