**The Canadian Journal for Teacher Research** Stephen Murgatroyd 2015-01-22 Teacher research in Canada: Although the job might be hard the quest is worth it. It is about teacher power. We trust teachers and we believe they have powerful knowledge, insight, and experience that should be shared widely-and we mean to attempt that sharing. We are a community, bound by an ethos: we care about children and we want to help them learn. We also believe that teacher research is important and that not enough of it is done. We hope to correct that poverty. Our work is based upon three beliefs about research: 1) the WHAT is important-we need to seek and create knowledge and that knowledge should be based upon our best inquiry; 2) the SO WHAT is important. We are a community of critical action. We need to consider how what we learn SHOULD be applied; & 3) the NOW WHAT is important. We have to actually engage children in the best ways we know how, with the best of what we have learned. This is what The Canadian Journal for Teacher Research is all about. Our goal is to transform teaching in Canada.

Levin and Lynne Schrum offer their readers the distinct advantage of compressing into a single volume what it took me

decades to learn. They not only present the big ideas of effective school leadership, but bring them alive through case studies that illustrate how those ideas manifest themselves in leaders' day-to-day behaviors. . . . I encourage you to use the ideas and practices you find here to leverage technology to create schools in which all students and adults thrive." —From the Foreword by Dennis Sparks, Emeritus Executive Director, National Staff Development Council (Learning Forward) Prepublication Reviews: "In *Leading Technology-Rich Schools*, the authors present a fascinating and exciting set of case studies that provide great insight into the ways leaders can support high-level innovation in schools. Importantly, their focus is on technology that enhances learning and teaching, rather than technology as an expensive school ornament. A must-read for those who study and practice educational leadership." —Jeffrey S. Brooks, Associate Professor and Educational Leadership Program Coordinator, School of Education, Iowa State University, author of *Black School, White School: Racism and Educational (Mis)leadership* "This book is a precious gift for the vast majority of administrators who desperately need concrete examples of how to create, facilitate, and sustain technology-infused learning environments." —Scott McLeod, Associate Professor and Founding Director, CASTLE, University of Kentucky "These rich illustrations of technology leadership in secondary schools show how a number of complex variables must come together to produce the key outcome of positioning educational technology as a support to teaching and learning. Examples of leadership practices that coordinate team members for interdependent work and invite teachers' involvement should prove to be a valuable resource to practitioners and also provide insight to policymakers for how they can create supportive conditions for such work." —Sara Dexter, Associate Professor, Department of Leadership, Foundations, and Policy, Curry School of Education, University of Virginia "Leading Technology-Rich Schools is a key advance in understanding how

technology can best be integrated in today's schools. These case studies of effective practice are sure to become required reading for those in leadership positions who are using technology for school improvement." —Glen L. Through these vivid case studies, Levin and Schrum illuminate a dynamic and complex set of lessons learned to help all school leaders undertake transformations of their schools." —L. *George Washington* Kevin J. Hayes 2017-04-03 When it comes to the Founding Fathers, Thomas Jefferson, Benjamin Franklin, and Alexander Hamilton are generally considered the great minds of early America. George Washington, instead, is toasted with accolades regarding his solid common sense and strength in battle. Indeed, John Adams once snobbishly dismissed him as "too illiterate, unlearned, unread for his station and reputation." Yet Adams, as well as the majority of the men who knew Washington in his life, were unaware of his singular devotion to self-improvement. Based on a comprehensive amount of research at the Library of Congress, the collections at Mount Vernon, and rare book archives scattered across the country, Kevin J. Hayes corrects this misconception and reconstructs in vivid detail the

active intellectual life that has gone largely unnoticed in conventional narratives of Washington. Despite being a lifelong reader, Washington felt an acute sense of embarrassment about his relative lack of formal education and cultural sophistication, and in this sparkling literary biography, Hayes illustrates just how tirelessly Washington worked to improve. Beginning with the primers, forgotten periodicals, conduct books, and classic eighteenth-century novels such as Tom Jones that shaped Washington's early life, Hayes studies Washington's letters and journals, charting the many ways the books of his upbringing affected decisions before and during the Revolutionary War. The final section of the book covers the voluminous reading that occurred during Washington's presidency and his retirement at Mount Vernon. Throughout, Hayes examines Washington's writing as well as his reading, from The Journal of Major George Washington through his Farewell Address. The sheer breadth of titles under review here allow readers to glimpse Washington's views on foreign policy, economics, the law, art, slavery, marriage, and religion-and how those views shaped the young nation.. Ultimately, this sharply written biography offers a fresh perspective on America's Father, uncovering the ideas that shaped his intellectual journey and, subsequently, the development of America.

**Why Study Literature?** Jan Alber 2012-04-12 This book presents new ways of thinking about the historical, epistemological and institutional role of literature, and aims at providing a theoretically well-founded basis for what might otherwise be considered a relatively unfounded historical fact, i.e. that both literature and the

teaching of literature hold a privileged position in many educational institutions. The contributors take their point of departure in the title of the volume and use narratological, historical, cognitive, rhetorical, postcolonial and political frameworks to pursue two separate but not necessarily related questions: Why literature? and, Why study? This collection brings together theoretical studies and critical analyses on literature as a medium among, and compared to, other media and includes essays on the physical and mental geography of literature, focusing on the consequences and values of its reading and studying.
